## 01.3 SECUTEX PROTECTIVE HOSES

secutex Clip sleeves

Clip sleeve „SC“  
Clip sleeve „easyClip“

Clip sleeve „SC“  
Clip sleeve „easyClip“

With full-length opening on reverse side

The secutex Clip SC can be installed in seconds thanks to the mounting slit on the back. Recommended for use wherever round slings with or without protective sleeves are needed on a case-by-case basis. Important: The Clip SC offers simple handling and short preparation times.

The secutex protective coating adheres to the load softly and flexibly, increasing the radius of critical edges. The lifting forces are distributed across a larger area and the load remains undamaged.

### The advantages

- Can be positioned in existing lifting situations
- Allows very flexible working procedures
- Easy to install by hand
- Nearly indestructible

Cross-section of secutex clip:  
Protective sleeve coated on two sides with longitudinal opening on reverse side

Clip sleeve „SC“

Premium and standard versions

### The advantages

- Can be positioned in existing lifting situations
- Nearly indestructible
- Durably keeps its shape
