Dear Ladies and Gentlemen,

We have to increase the prices for **the product groups secutex protection and other molded parts made of polyurethane** by 6.8% from June 1, 2022.

Last year, we still had hopes for a normalization and a turnaround of the trend. Today, we must realize that the price situation in the steel and polyurethane supply sectors, which are especially important to us, will stay difficult. Our suppliers have fully implemented price increases of 15-70%, and now the drastic increases for energy have been added to this.

We ask for your understanding for these difficult but unavoidable step. Should there be any problems with the implementation of the price increase we have previously published for any planned projects, please let us know; together we will definitely find a way.

With best regards

Boris Franke  
Managing Director
