Official welcome by Mrs. Petra Nießen, Mr. Dennis ...

40 years of „one layer better“.

40 years of „one layer better“.

This was the motto of the in-house exhibition on May 12, 2023 at SpanSet secutex in Geilenkirchen. More than 200 visitors from many countries around the world came that day to inform about the new technical possibilities in polyurethane processing.

secuGrip

secuGrip is the name of the anti-slip and wear-resistant spray coating. On the new spray line, robot-supported, parts with a maximum length of 12 m can be coated. With an investment of nearly 300,000 €, the largest and most powerful system for processing spray materials has been installed.

secutex Technical Center

In the new secutex technical center, new materials can be produced very quickly and efficiently. Before, production equipment always had to be used for this process, which caused problems and also delays in ongoing processes. Additionally, technical solutions can be tested extensively here, as an example we would like to point out pressure tests of structural components with up to 100t pressing force.

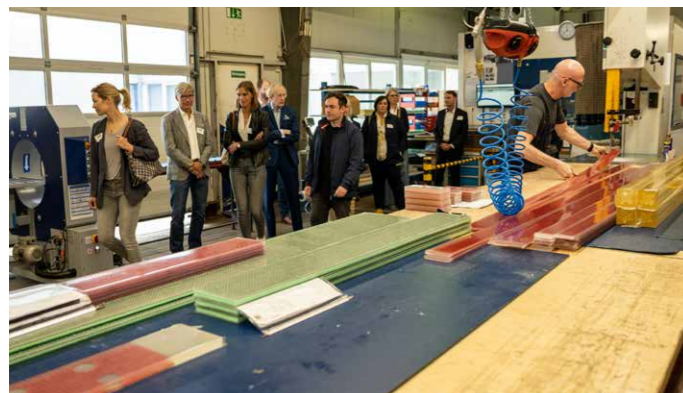

secutex Production

During the tour through the production, the visitors could see the wide range of processing possibilities very clearly. Especially remarkable was the practical demonstration of the different assembly possibilities of the secutex protection profiles.

secutex laboratory & Mold making

Perfect solutions, always proven in detail. By the technical manager of SpanSet secutex, Dr. Mennenga, the different test procedures were presented and explained in detail in the in-house laboratory.

From the idea, via the 3D drawing and via the appropriate CAM software, directly into the CNC-controlled machine. SpanSet secutex has a modern machine shop for the production of all required casting molds and tools.

Discussions & Talks

After the detailed tour through the production and the rooms of SpanSet secutex, there were many opportunities for discussion and exchange of experiences. And also the culinary well-being was well taken care of.

Greetings & Thanks

In his greeting, Spanset secutex Managing Director Boris Franke described the company's first experiments at the beginning of the 1980s and its development into one of the leading manufacturers of elastomer products. His special thanks went to the company's long-time friends and partners.

The other managing directors, Andreas Höltkemeier and Petra Nießen, addressed their words to the international guests and also made special reference to the very experienced employees, without whom the success of SpanSet secutex would not have been possible at all. At the end of the greetings, Mr. David Ehnimb, as the leading shareholder, expressed his special thanks to the long-standing management.

Event & Party

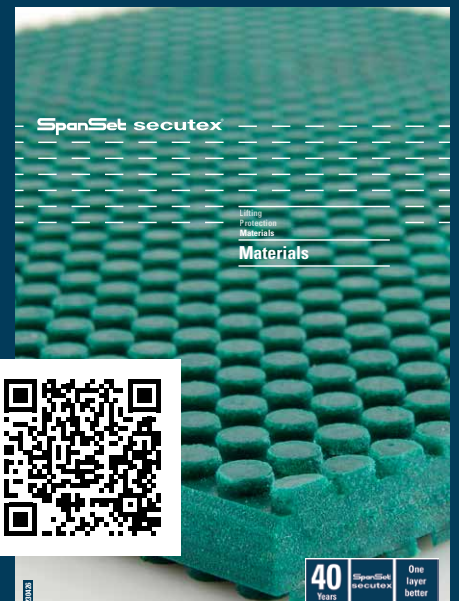

40 years of SpanSet secutex, that's a great reason to celebrate. Together with friends, partners and employees it was a fantastic evening. Good food, perfect drinks and nice weather provided the perfect setting for many talks and a pleasant get-to-know-you. There was a lot of celebrating and dancing to the live music of the excellent cover band „The Wheels“ from Aachen. When the great evening then came to an end, all guests agreed: secutex, is „again a layer better“.
